Dear Hiring Manager,

I am writing to you to express my interest in the Software Engineer role at your company. As a Master's candidate in Computer Science at the University of Copenhagen with backend experience at Disney Streaming and a track record building full-stack applications, I believe I would be a great fit for the position.

At Disney Streaming, I designed, coded, and debugged features in a serverless environment, utilizing AWS resources to deliver messaging services for over 235 million subscribers. During my time here, I also implemented changes in logging resulting in a 74% reduction of logging costs for the messaging team.

On the frontend and full-stack side, I've built React-based interfaces that match pixel-perfect designs and integrate seamlessly with backend services. Whether it was deploying a desktop GUI for a machine-learning defense recommender or architecting a React/Python arbitrage bot with a cross-platform dashboard, I always prioritize clean code, responsive layouts, and intuitive user experiences.

If given the chance, I look forward to joining your team and supporting your efforts toward continued success. Thank you for considering my application.

Best regards,

Allan Genari Gaarden
